

Bio-45MF

Bio-45MF with brushed nickel door

The BIO-45MF wood pellet stove, with patented COMBEX technology, gives you all the advantages of wood pellet heat: easy to use, 45-hour autonomy, thermostatic control, electronic lighting, energy economy, and extraordinary heat and cleanliness. The COMBEX system balances combustion air and uptake to provide clean, worry-free combustion which is less dependent on the leak-tightness of the device and the quality of the combustible. The integrated air mate evacuates pre-heated air over 250°F (120°C) into the room. Beyond its top-notch technical features, the BIO-45MF fits easily into any décor, thanks to the black, gold and brushed nickel finish options of its ingenious door overlay system and heat distribution louver. With the BIO-45MF, it's hard to resist the clean, renewable energy of wood pellets!

Features

Recommended heating area:	2,200 sq. ft.*
Heating capacity:	45,000
Exterior dimensions:	25 1/4"W x 28 3/4"D x 33"H
Loading capacity:	60 lb
Ash drawer:	Yes
Electronic igniter:	Yes
Thermostatic or manual mode options:	Yes
Mobile home approved:	Yes **

*See note 1 on page 26 **See note 2 on page 26 (See complete technical data on page 27)

Options

3" ground floor venting kit
4" basement venting kit
Remote control
Sealing box for fresh air kit
Cast iron door overlay black, gold plated or brushed nickel plated
Louver kit black, gold plated or brushed nickel plated
Decorative masonry-like panels
Decorative log set
Fresh air intake kit (3" diameter)
