Euromax with brushed nickel door

The Euromax is as close as you can get to a pellet furnace. Equipped with a 125-pound hopper, this stylish heating machine will burn various types of biomass, including wood, bark, and switch grass pellets. Its state-of-the-art LCD control lets you choose between various settings with the touch of a finger. The bottom feed technology used inside the Euromax minimizes burn pot maintenance while allowing a more complete and efficient combustion. Affordable, intelligent, stylish, and clean... This is heating in the 21st Century.

Euromax with black door
