The P68 automatically lights its own fire and burns at the correct output to maintain the desired room temperature. When no heat is required, the P68 will shutdown and re-ignite when the demand for heat returns. Just fill the hopper with pellets and set the desired temperature. The P68 will do the rest except for ash removal, which will be needed after approximately one ton of pellets has been consumed.

Harman P68 Features
Room Temperature Sensor
Patented Feeder
Swing Open Ash Door
Accordion Heat Exchanger
Air-Cooled Combustion Blower
Automatic Temperature Control
Over 127 Square Inches Of Glass
Harman Patented Burner Pot With Automatic Ignition
ESP Probe
Large 76lb Hopper (136lbs with hopper extension)
