## Wood & Coal Burning Cook Stoves

### Holds its Own Power

With a Heartland Wood Burning Cook Stove, you can keep your home glowing through ice and snow and power failures. The Oval is capable of heating up to 1800 square feet and the Sweetheart, up to 1500 square feet. No matter what is happening outside, you can still enjoy everything from a steamy bath to a hot cup of cocoa to a snug night's sleep. (With optional water jacket.)

### Keeps You in Hot Water

Choose an optional copper reservoir with a tap or install a hot water jacket. The installed water jacket can boil a 40-gallon water tank in an hour with the stove running at full operation. Many owners choose to run this system on a thermosyphon, eliminating the need for electricity. Wood heat can be very dry but the water reservoir provides ample humidity. Use it to do all the dishes.

*Note: Refer to water jacket manual and have it installed by a professional.*

### Unforgettable Flavor

Find out firsthand why your grandmother always said that nothing matched a pie baked in the cook stove. The oven is heated from all sides, cooking the food evenly and to perfection every time. Thaw your frozen food, warm your plates or watch your dough rise in the warming closet.

### Lighten Your Workload

You're intrigued with the idea of owning a Heartland Wood Burning Cook Stove but feeling like it might be too labor intensive to maintain. Think again. Fuel can be top or front loading, the oven interior is porcelain coated with an ash pan that slides out for cleaning. This is the good old days only better

1903 - Oval with Reservoir

1902 - Oval with out Reservoir

### Oval Wood Burning Features

#### Wood Burning Cook Stove

#### Model 1902 (Model 1903 with Reservoir)

- Warms up to 1,800 square feet
