The Tison Wood Stove

The TISON is a high efficiency wood stove, which, when heated with very dry cordwood, can reach up to 88% efficiency.

This model with pedestal can heat up to 2500 ft² and is provided with an easy access ash drawer; its glass area allows great visibility of the wood fire.

It can be equipped with 2 fans and 1 thermodisc (optional) for better heat distribution.

The TISON strictly respects the environment with its emission levels as low as 1.34 Gr / H, making it the best wood stove in its class among those currently available on the market. This model can be suitable for certified Novoclimat houses.
