

THE FOLLOWING AMENDMENT AFFECTS PAGE 9 OF THE INSTALLATION AND OPERATION MANUAL P/N 775,196M WITH REVISION NC (MANUALS WITH A REV. A OR LATER INCLUDES THIS INFORMATION). NOTE: THE MANUAL REVISION LEVEL IS PRINTED ON THE FRONT COVER AND THE BACK PAGE OF THE MANUAL.

GENERAL INFORMATION

The purpose of this addendum is to clarify that the standard factory-set damper setting should be as shown in **Figure 1** in this document. The damper may need to be adjusted from this standard setting depending on many variables within the installation. Once the stove is installed, the flame appearance should be evaluated and the damper adjusted accordingly. See **Pages 9 and 20** of the Installation and Operation Manual for additional information on properly adjusting the damper.

Any copies you may have of p/n 775,196M manuals which are Rev NC, should be discarded or have a copy of this addendum attached to **Page 9** of the manual. The updated manual, 775,196M Rev A, is available for download at www.Lennox.com.

If you encounter any problems, need clarification of this addendum or are not qualified to properly adjust the damper, contact your local distributor or dealer.

READ THE INSTALLATION AND OPERATION MANUAL IN ITS ENTIRETY BEFORE BEGINNING THE INSTALLATION AND ADJUSTMENT OF THE APPLIANCE.

ALL WARNINGS AND PRECAUTIONS IN THE INSTALLATION AND OPERATION MANUAL PROVIDED WITH THE APPLIANCE APPLY TO THE INSTRUCTIONS IN THIS ADDENDUM.

TURN OFF THE APPLIANCE AND ALLOW IT TO COMPLETELY COOL BEFORE PROCEEDING.

TOOLS NEEDED

1/4" Nut Driver

DAMPER LOCATION AND ADJUSTMENT

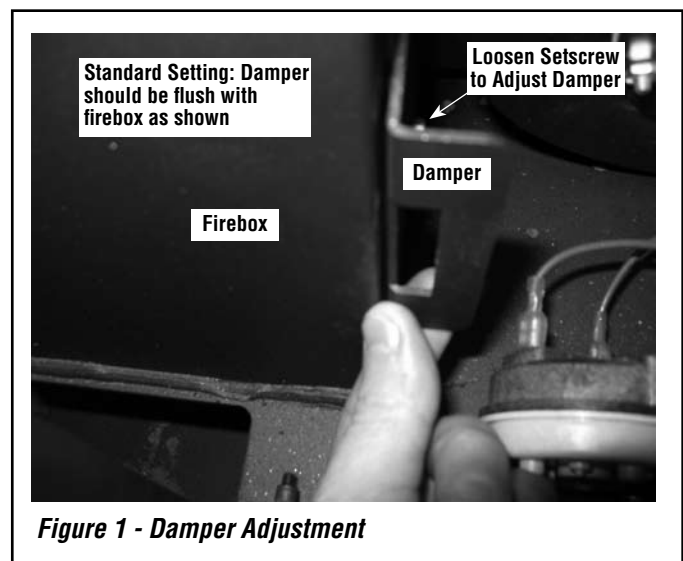

Damper Air Control

Located behind the right side panel on model Montage™ 32FS.

Adjustment Procedure

Using a 1/4" nut driver or socket, loosen the damper setscrew (see **Figure 1**). Adjust in 1/4" increments until optimum combustion air flow is achieved. Retighten the damper setscrew.

For less air push in and for more air pull out.

NOTE: DIAGRAMS & ILLUSTRATIONS ARE NOT TO SCALE.
